Summary

Data Analyst with 3 years of experience in analytics, data modeling, and reporting automation. Skilled in Python, SQL, R, and BI tools to build dashboards, data pipelines, and performance metrics that support strategic decision-making. Proven ability to lead cross-functional projects and translate complex datasets into clear insights that optimize operations and inform business strategy.

Professional Experience

Potest AI

Jul 2025 - Present

Data Scientist

Pittsburgh, USA

- Built inventory tracking dashboards in Data Studio by analyzing ingredient-level usage trends across 25+ SKUs, enabling proactive restocking decisions that cut stockouts by 18% and overstock by 12%.
- Delivered actionable time-series insights using SARIMAX data modeling to capture seasonal demand shifts, reducing MAPE by 22% and driving more accurate supply chain forecasts.

TIAA Financial Services

Jan 2025 - May 2025

Data Scientist

Pittsburgh, USA

- Led the NLP based clustering analysis of 1.6M CFPB complaint narratives, uncovering latent structure through clustering techniques that guided a full taxonomy redesign, improving issue traceability and regulatory reporting accuracy.
- Built an interactive Streamlit dashboard as a business product solution to streamline complaint intake and issue tagging, empowering the compliance team to resolve high-priority issues 30% faster and reducing manual tracking of complaints.

Micron Technology

Jul 2022 - Jul 2024

Data Scientist

Hyderabad, India

- Analyzed large-scale manufacturing datasets and applied advanced statistical techniques to streamline wafer measurement reporting, driving a 30% faster turnaround in operational analysis and experimentation cycles.
- Designed and implemented data-driven reporting frameworks that improved detection of production anomalies by 15%, reducing rework and minimizing downstream losses.
- Developed and deployed interactive dashboards in PowerBI and Tableau to monitor real-time wafer health, eliminating manual reporting and enabling engineers to shorten preparation cycles by 2 weeks.
- Built and optimized data automation systems and ETL workflows to consolidate high-volume sensor and production data into BigQuery, reducing query latency by 40% and providing near real-time analytics for process monitoring.
- Conducted root cause analysis on recurring yield bottlenecks using statistical modeling, delivering insights that enabled corrective actions and generated \$10M+ in annual savings.

ByteDance

Mar 2020 - Aug 2020

Product Analyst

Mumbai, India

- Built Python-based churn prediction data modeling solutions to analyze user behavior, enabling product teams to identify at-risk cohorts early and implement targeted retention strategies that increased user penetration by 5%.
- Delivered real-time analytical insights through interactive KPI-based dashboards in Data Studio and PowerBI, guiding 10+ stakeholders in running A/B tests that improved user engagement.

Projects

Peer-to-Peer Lending Risk & Return Modeling

Mar 2025 - Apr 2025

CMU Classroom Project (Business Value for Integrative Analytics)

Pittsburgh, USA

- Built and validated Decision Tree, Logistic Regression, and Lasso models in Python and R on 240K+ LendingClub records to predict loan defaults and returns, improving AUC by 18% and reducing false positives through SQL-driven data quality checks in BigQuery

Customer Targeting Optimization for Bank Deposit Campaign

Jan 2025 - Feb 2025

CMU Classroom Project (Analytical Marketing)

Pittsburgh, USA

- Designed and implemented a Logistic Regression model in Python with A/B testing and causal analysis to predict customer conversion, used SQL and Excel to extract and clean data, applied confidence interval calculations and segmentation to raise conversion from 8% to 15% and boost projected ROI by \$90K

Education

Carnegie Mellon University, Tepper School of Business

Aug 2024 - May 2025

Master of Science, Business Analytics

Pittsburgh, PA

- GPA: 4.0/4.0

Indian Institute of Technology Kharagpur

Jul 2017 - Jun 2022

Integrated B.Tech + M.Tech, Chemical Engineering

Kharagpur, India

- GPA: 8.2/10

Skills

- **Programming Languages:** Python, R, C++, C, JavaScript, HTML/CSS
- **Data Analysis & Modeling:** Data Analysis, Data Mining, Data Exploration, KPI Analysis, Data Modeling, Data Storytelling
- **Machine Learning & AI:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, OpenCV, SPSS
- **Databases & Warehousing:** SQL, NoSQL, MongoDB, BigQuery
- **Data Engineering & Automation:** Data Automation Systems, Reporting Automation, Data Collection Systems, Business Product Solutions, Real-time Systems
- **Visualization & Reporting:** Looker, Tableau, PowerBI, Dashboard Design, Dashboard Creation, Data Visualization, Data Visualization Software - Data Studio, Performance Metrics
- **Productivity & Collaboration Tools:** Microsoft Excel, Google Workspace, Microsoft PowerPoint
